Đỗ Công Minh

Software Engineer | Typescript | Rust | C++ | Python
Vietnam

Summary

My biggest passion is software and computer science but I am also very excited to learn other programming languages. My main goal right now is to get as much experience as possible and learn from the best companies. With time, I can learn new skills to increase my abilities as a programmer, but I still enjoy to work on challenging tasks and do not hesitate when starting a project

Experience

Neko Global
